2x10W RMS/ 2x20W music power

Full range Bass Reflex Speaker

3 CD Changer

30 hours of MP3-CD music

Dual tape deck

Digital sound control

Digital Sound Control lets you select from pre-set modes that control the frequency bands of sound to optimise certain musical styles. You can chose between different sound settings - Optimal, Jazz, Rock, Techno, Pop or Classic. Each mode uses graphic equalising technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Digital Sound Control lets you get the most out of your music by adjusting the sound balance to match the music type you are playing.

Dynamic Bass Boost

Dynamic Bass Boost maximises your music enjoyment by emphasising the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.
